Date: 8 MAR 2021

### CIRCULAR

Subject: Minor Correction in 18CSMP68 regarding.

Reference: Chairperson BOS in CSE/ISE email dated 04.03.2021

Minor corrections in the descriptions (Instructions) section are made in the laboratory syllabus "MOBILE APPLICATION DEVELOPMENT" (18CSMP68) of 2018 scheme CSE and ISE programmes and the same is mentioned below-

#### Existing

1. The installation procedure of the Android Studio/Java software must be demonstrated and carried out in groups.
2. Students should use the latest version of Android Studio/Java/ Kotlin to execute these programs. Diagrams given are for representational purposes only; students are expected to improvise on them.

#### To read as

1. The installation procedure of the Android Studio/Java software must be demonstrated and carried out in groups.
2. Students should use the latest version of Android Studio/Java/ Kotlin to execute these programs. Diagrams given are for representational purposes only, students are expected to improvise on them.
3. **Part B programs should be developed as an application and are to be demonstrated as a mini project in a group by adding extra features or the students can also develop their application and demonstrate it as a mini-project. (Projects/programs are not limited to the list given in Part B).**

A syllabus copy is enclosed with this circular for reference to the concerned. Also, corrected CSE/ISE syllabus is made available @ <https://vtu.ac.in/b-e-scheme-syllabus/#menu0>.

All the Principals of Engineering Colleges are hereby requested to inform these corrections to the faculty who are handling this laboratory.

**Encl:** As mentioned above

Sd/-  
REGISTRAR

To,

- All the Principals of the Engineering Colleges under the ambit of VTU Belagavi

#### Copy to:

1. The Registrar(Evaluation) for information and needful
2. The Registrar's Office, VTU, Belagavi, for information.
3. The Special Officer, Academic Section, VTU Belagavi, for information.
4. The Special Officer CNC section to upload the circular on the VTU web portal.

REGISTRAR

**MOBILE APPLICATION DEVELOPMENT**  
(Effective from the academic year 2018 -2019)

**SEMESTER – VI**

<b>Course Code</b>	<b>18CSMP68</b>	<b>IA Marks</b>	<b>40</b>
<b>Number of Contact Hours/Week</b>	<b>0:0:2</b>	<b>Exam Marks</b>	<b>60</b>
<b>Total Number of Contact Hours</b>	<b>3 Hours/Week</b>	<b>Exam Hours</b>	<b>03</b>

**CREDITS – 02**

**Laboratory Objectives:** This laboratory (18CSMP68) will enable students to

- Learn and acquire the art of Android Programming.
- Configure Android studio to run the applications.
- Understand and implement Android's User interface functions.
- Create, modify and query on SQLite database.
- Inspect different methods of sharing data using services.

**Descriptions (if any):**

1. The installation procedure of the Android Studio/Java software must be demonstrated and carried out in groups.
2. Students should use the latest version of Android Studio/Java/ Kotlin to execute these programs. Diagrams given are for representational purposes only, students are expected to improvise on them.
3. Part B programs should be developed as an application and are to be demonstrated as a mini project in a group by adding extra features or the students can also develop their application and demonstrate it as a mini-project. (Projects/programs are not limited to the list given in Part B).

**Programs List:**

**PART – A**

- 1 Create an application to design a Visiting Card. The Visiting card should have a company logo at the top right corner. The company name should be displayed in Capital letters, aligned to the center. Information like the name of the employee, job title, phone number, address, email, fax and the website address is to be displayed. Insert a horizontal line between the job title and the phone number.

COMPANY NAME

Name

Job Title

Phone Number

Address

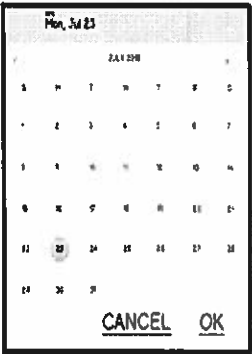

Email, website, fax details

- 2 Develop an Android application using controls like Button, TextView, EditText for designing a calculator having basic functionality like Addition, Subtraction, Multiplication, and Division.

	<p style="text-align: center;"><b>SIMPLE CALCULATOR</b></p> <p style="text-align: center;">Result</p> <div style="text-align: center;"> <input type="text" value="Input &lt;Edit Text&gt;"/> </div> <div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; gap: 5px;"> <div>7</div><div>8</div><div>9</div><div>/</div> </div> <div style="display: flex; gap: 5px;"> <div>4</div><div>5</div><div>6</div><div>*</div> </div> <div style="display: flex; gap: 5px;"> <div>1</div><div>2</div><div>3</div><div>-</div> </div> <div style="display: flex; gap: 5px;"> <div>.</div><div>0</div><div>=</div><div>+</div> </div> <div style="margin-top: 10px;">C</div> </div>
3	<p>Create a SIGN Up activity with Username and Password. Validation of password should happen based on the following rules:</p> <ul style="list-style-type: none"> <li>• Password should contain uppercase and lowercase letters.</li> <li>• Password should contain letters and numbers.</li> <li>• Password should contain special characters.</li> <li>• Minimum length of the password (the default value is 8).</li> </ul> <p>On successful <b>SIGN UP</b> proceed to the next Login activity. Here the user should <b>SIGN IN</b> using the Username and Password created during signup activity. If the Username and Password are matched then navigate to the next activity which displays a message saying "Successful Login" or else display a toast message saying "Login Failed". The user is given only two attempts and after that display a toast message saying "Failed Login Attempts" and disable the SIGN IN button. Use Bundle to transfer information from one activity to another.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p><b>SIGNUP ACTIVITY</b></p> <div style="display: flex; justify-content: center; gap: 20px;"> <div>Username: <input type="text"/></div> <div>Password: <input type="text"/></div> </div> <div style="margin-top: 10px;"> <input type="button" value="SIGN UP"/> </div> </div> <div style="text-align: center;"> <p><b>LOGIN ACTIVITY</b></p> <div style="display: flex; justify-content: center; gap: 20px;"> <div>Username: <input type="text"/></div> <div>Password: <input type="text"/></div> </div> <div style="margin-top: 10px;"> <input type="button" value="SIGN IN"/> </div> </div> </div>
4	<p>Develop an application to set an image as wallpaper. On click of a button, the wallpaper image should start to change randomly every 30 seconds.</p> <p style="text-align: center;"><b>CHANGING WALLPAPER APPLICATION</b></p> <div style="text-align: center; margin-top: 20px;"> <input type="button" value="CLICK HERE TO CHANGE WALLPAPER"/> </div>
5	<p>Write a program to create an activity with two buttons START and STOP. On pressing of the START button, the activity must start the counter by displaying the numbers from One and the counter must keep on counting until the STOP button is pressed. Display the counter</p>

	<p>value in a TextViewcontrol.</p> <div>COUNTER APPLICATION</div> <div>Counter Value</div> <div>START</div> <div>STOP</div>																		
6	<p>Create two files of XML and JSON type with values for City_Name, Latitude, Longitude, Temperature,andHumidity. Develop an application to create an activity with two buttons to parse the XML and JSON files which when clicked should display the data in their respective layouts side by side.</p> <div>PARSING XML AND JSON DATA</div> <table><tr><td>PARSING XML AND JSON DATA</td><td>XML DATA</td><td>JSON Data</td></tr><tr><td><div>Parse XML Data</div></td><td>City_Name: Mysore</td><td>City_Name: Mysore</td></tr><tr><td></td><td>Latitude: 12.295</td><td>Latitude: 12.295</td></tr><tr><td></td><td>Longitude: 76.639</td><td>Longitude: 76.639</td></tr><tr><td><div>Parse JSON Data</div></td><td>Temperature: 22</td><td>Temperature: 22</td></tr><tr><td></td><td>Humidity: 90%</td><td>Humidity: 90%</td></tr></table>	PARSING XML AND JSON DATA	XML DATA	JSON Data	<div>Parse XML Data</div>	City_Name: Mysore	City_Name: Mysore		Latitude: 12.295	Latitude: 12.295		Longitude: 76.639	Longitude: 76.639	<div>Parse JSON Data</div>	Temperature: 22	Temperature: 22		Humidity: 90%	Humidity: 90%
PARSING XML AND JSON DATA	XML DATA	JSON Data																	
<div>Parse XML Data</div>	City_Name: Mysore	City_Name: Mysore																	
	Latitude: 12.295	Latitude: 12.295																	
	Longitude: 76.639	Longitude: 76.639																	
<div>Parse JSON Data</div>	Temperature: 22	Temperature: 22																	
	Humidity: 90%	Humidity: 90%																	
7	<p>Develop a simple application withoneEditTextso that the user can write some text in it. Create a button called “Convert Text to Speech” that converts the user input text into voice.</p> <div>TEXT TO SPEECH APPLICATION</div> <div>Convert Text to Speech</div>																		
8	<p>Create an activity like a phone dialer withCALLand SAVE buttons. On pressing the CALL button, it must call the phone number and on pressing the SAVE button it must save the number to the phone contacts.</p>																		

	<div style="text-align: center;"><b>CALL AND SAVE APPLICATION</b></div> <div style="text-align: center;"><div style="display: inline-block; border: 1px solid black; padding: 2px 10px;">1234567890</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">DEL</div></div> <div style="text-align: center; margin-top: 10px;"><div style="display: inline-block; border: 1px solid black; padding: 2px 10px;">1</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">2</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">3</div></div> <div style="text-align: center; margin-top: 10px;"><div style="display: inline-block; border: 1px solid black; padding: 2px 10px;">4</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">5</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">6</div></div> <div style="text-align: center; margin-top: 10px;"><div style="display: inline-block; border: 1px solid black; padding: 2px 10px;">7</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">8</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">9</div></div> <div style="text-align: center; margin-top: 10px;"><div style="display: inline-block; border: 1px solid black; padding: 2px 10px;">*</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">0</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">#</div></div> <div style="text-align: center; margin-top: 10px;"><div style="display: inline-block; border: 1px solid black; padding: 2px 10px;">CALL</div> <div style="display: inline-block; border: 1px solid black; padding: 2px 10px; margin-left: 10px;">SAVE</div></div>
<b>PART - B</b>	
<b>1</b>	<p>Write a program to enter Medicine Name, Date and Time of the Day as input from the user and store it in the SQLite database. Input for Time of the Day should be either Morning or Afternoon or Evening or Night. Trigger an alarm based on the Date and Time of the Day and display the Medicine Name.</p> <div style="text-align: center; margin-top: 20px;"><b>MEDICINE DATABASE</b></div> <div style="text-align: center; margin-top: 10px;"><p>Medicine Name: <div style="border: 1px solid black; width: 100px; height: 20px; display: inline-block;"></div></p><p>Date: <div style="border: 1px solid black; width: 100px; height: 20px; display: inline-block;"></div></p><p>Time of the Day: <div style="border: 1px solid black; width: 100px; height: 20px; display: inline-block;"></div></p><div style="margin-top: 10px;"><div style="border: 1px solid black; padding: 2px 10px; display: inline-block;">Insert</div></div></div>
<b>2</b>	<p>Develop a content provider application with an activity called "Meeting Schedule" which takes Date, Time and Meeting Agenda as input from the user and store this information into the SQLite database. Create another application with an activity called "Meeting Info" having DatePicker control, which on the selection of a date should display the Meeting Agenda information for that particular date, else it should display a toast message saying "No Meeting on this Date".</p>

	<div data-bbox="940 219 1102 250" data-label="Section-Header"> <h3>MEETING INFO</h3> </div> <div data-bbox="836 288 1209 329" data-label="Text"> <p>Pick a date to get meeting info: <input data-bbox="1093 288 1165 329" type="text" value=" / "/> </p> </div> <div data-bbox="336 383 707 421" data-label="Section-Header"> <h3>MEETING SCHEDULE</h3> </div> <div data-bbox="328 465 718 515" data-label="Text"> <p>Date: <input data-bbox="558 465 718 515" type="text"/></p> </div> <div data-bbox="328 544 718 593" data-label="Text"> <p>Time: <input data-bbox="558 544 718 593" type="text"/></p> </div> <div data-bbox="328 620 718 669" data-label="Text"> <p>Meeting Agenda: <input data-bbox="558 620 718 669" type="text"/></p> </div> <div data-bbox="384 707 647 743" data-label="Text"> <p><input data-bbox="373 703 671 754" type="button" value="Add Meeting Agenda"/></p> </div> <div data-bbox="991 714 1050 743" data-label="Text"> <p><input data-bbox="983 710 1062 757" type="button" value="Search"/></p> </div> <div data-bbox="1082 353 1334 705" data-label="Image">  </div>
3	<p>Create an application to receive an incoming SMS which is notified to the user. On clicking this SMS notification, the message content and the number should be displayed on the screen. Use appropriate emulator control to send the SMS message to your application.</p> <div data-bbox="691 945 1010 981" data-label="Section-Header"> <h3>SMS APPLICATION</h3> </div> <div data-bbox="711 1046 963 1077" data-label="Text"> <p>Display SMS Number</p> </div> <div data-bbox="711 1099 978 1133" data-label="Text"> <p>Display SMS Message</p> </div>
4	<p>Write a program to create an activity having a Text box, and also Save, Open and Create buttons. The user has to write some text in the Text box. On pressing the Create button the text should be saved as a text file in MksDcard. On subsequent changes to the text, the Save button should be pressed to store the latest content to the same file. On pressing the Open button, it should display the contents from the previously stored files in the Text box. If the user tries to save the contents in the Textbox to a file without creating it, then a toast message has to be displayed saying "First Create a File".</p> <div data-bbox="708 1424 971 1453" data-label="Section-Header"> <h3>FILE APPLICATION</h3> </div> <div data-bbox="708 1494 807 1529" data-label="Text"> <p><input data-bbox="703 1494 807 1529" type="button" value="Create"/></p> </div> <div data-bbox="868 1494 959 1529" data-label="Text"> <p><input data-bbox="863 1494 959 1529" type="button" value="Open"/></p> </div> <div data-bbox="699 1556 970 1675" data-label="Form"> <input data-bbox="699 1556 970 1675" type="text"/> </div> <div data-bbox="802 1713 857 1738" data-label="Text"> <p><input data-bbox="788 1713 873 1749" type="button" value="Save"/></p> </div>
5	<p>Create an application to demonstrate a basic media player that allows the user to Forward, Backward, Play and Pause an audio. Also, make use of the indicator in the seek bar to move the audio forward or backward as required.</p>

	<p style="text-align: center;"><b>MEDIA PLAYER APPLICATION</b></p> <p style="text-align: center;">Audio Name</p> 
6	<p>Develop an application to demonstrate the use of Asynchronous tasks in android. The asynchronous task should implement the functionality of a simple moving banner. On pressing the <b>Start Task</b> button, the banner message should scroll from right to left. On pressing the <b>Stop Task</b> button, the banner message should stop. Let the banner message be "Demonstration of Asynchronous Task".</p> <p style="text-align: center;"><b>ASYNCHRONOUS TASK</b></p> <p style="text-align: center;"> <input type="button" value="Start Task"/>  <input type="button" value="End Task"/> </p>
7	<p>Develop an application that makes use of the clipboard framework for copying and pasting of the text. The activity consists of two EditText controls and two Buttons to trigger the copy and paste functionality.</p> <p style="text-align: center;"><b>CLIPBOARD ACTIVITY</b></p> 
8	<p>Create an AIDL service that calculates Car Loan EMI. The formula to calculate EMI is</p> $E = P * (r(1+r)^n)/((1+r)^n - 1)$ <p>where</p> <ul style="list-style-type: none"> <li>E = The EMI payable on the car loan amount</li> <li>P = The Car loan Principal Amount</li> <li>r = The interest rate value computed on a monthly basis</li> <li>n = The loan tenure in the form of months</li> </ul> <p>The down payment amount has to be deducted from the principal amount paid towards buying the Car. Develop an application that makes use of this AIDL service to calculate the EMI. This application should have four EditText to read the PrincipalAmount, Down Payment, Interest Rate, Loan Term (in months) and a button named as "Calculate Monthly EMI". On click of this button, the result should be shown in a TextView. Also, calculate the EMI by varying the Loan Term and Interest Rate values.</p>

## CAR EMI CALCULATOR

Principal Amount:

Down Payment:

Interest Rate:

Loan Term (in months):

EMI: Result

Calculate Monthly EMI

**Laboratory Outcomes:** After studying these laboratory programs, students will be able to

- Create, test and debug Android application by setting up Android development environment.
- Implement adaptive, responsive user interfaces that work across a wide range of devices.
- Infer long running tasks and background work in Android applications.
- Demonstrate methods in storing, sharing and retrieving data in Android applications.
- Infer the role of permissions and security for Android applications.

### Procedure to Conduct Practical Examination

- Experiment distribution
  - For laboratories having only one part: Students are allowed to pick one experiment from the lot with equal opportunity.
  - For laboratories having PART A and PART B: Students are allowed to pick one experiment from PART A and one experiment from PART B, with equal opportunity.
- Change of experiment is allowed only once and marks allotted for procedure to be made zero of the changed part only.
- Marks Distribution (Course to change in accordance with university regulations)
  - For laboratories having only one part – Procedure + Execution + Viva-Voce: 15+70+15= 100 Marks
  - For laboratories having PART A and PART B
    - i. Part A – Procedure + Execution + Viva = 6 + 28 + 6 = 40 Marks
    - ii. Part B – Procedure + Execution + Viva = 9 + 42 + 9 = 60 Marks
